To Whom It May Concern

**REF: LETTER OF RECOMMENDATION ON THE ROMIX PRODUCT SUPPLIED BY G.N.
GLOBAL**

I had the opportunity to work with G.N.Global represented by Ngoni Wasarirevhu (Managing Director) on the trial of their new product called ROMIX which is used to preserve the wearing base of a gravel road. ROMIX was applied on a stretch of road which enters into our mill and the wearing base of the road was preserved last season with minimal wear. This particular stretch of road is exceptional in that all the cane haulage traffic concentrates on this road as it enters the mill and at times sustains the load of vehicles with a payload of 50 tonnes.

I would recommend the use of ROMIX to preserve the wearing base of any gravel road.

Regards
